

Electronics SG

November 2007

In general, Question 1 was answered reasonably well, but there is room for improvement. Candidates must be assisted to tackle more intricate questions. They lacked the ability to interpret and analyse

Questions 2, 3, 4, 5, 6, 7 and 8 were answered poorly. Candidates lacked a thorough understanding of most of the work. Teachers need to spend more time explaining the basic concepts in most of the work. More examples must be worked through so as to test candidates' understanding.
