

Empowering every student on the planet to achieve more. Microsoft is committed to enabling the lives of teachers and students through digital transformation.

Microsoft seeks to empower all teachers and youth by providing access to cutting-edge technology to prepare them with future ready skills. Microsoft modern classroom tools and programs includes digital literacy and computer science curriculum, online and offline productivity applications that develops digital skills needed to thrive in the fourth industrial revolution. Microsoft has a global platform for teachers to network and support each other using the Microsoft Educator Community, and enabling global connected communities through Skype in the Classroom. Free courses and other resources are available for teacher professional development and growth.

Pearson Auto Atlantic

At Pearson, we're here to help people make progress in their lives through learning. We work with teachers and learners to create and continually improve our wide range of products and services. We create content in all 11 official languages for learners from pre-school to Grade 12. Whether it's our trusted CAPS-approved textbooks, digital and supplementary resources or professional development courses, we put the learner at the heart of everything we do. Every day all over South Africa, our products and services help learning flourish - because wherever learning flourishes, so do people.

PPM Media

PPM Audio Visual provide fully customised, integrated audio-visual solutions for education and corporate environments. PPM Audio Visual provide products and components which are of high quality with good guarantees yet affordable which makes technology and interactive equipment accessible to clients (particularly in education) for whom it was previously unaffordable.

The audio-visual brands represented are:

- AVer – Visualizers, Cloud Conferencing and Codec Conferencing Systems
- CommBox – Control Systems and Interactive LED Panels
- PPM – Projection Screens, Cables, Brackets and Patch Points
- Wilson – Cell phone Signal Boosters

e2 Young Engineers

e² Young Engineers is an educational company with a focus on Early Childhood Development skills and STEM principles. We provide a simple learning solution for complex educational subjects in Science, Technology, Mechanical Engineering, Software Engineering and Mathematics. These educational curricula rationally adopt an edutainment (the combination of education and entertainment) approach which encourages a love for STEM in all learners, giving them a head-start to their future. We provide an engaging, hands-on learning platform where our educational goals are achieved by mobile assembly kits uniquely designed by our staff. This platform demonstrates the scientific principles in a fun and accessible fashion; combining experiments that form scientific intuition with stories that capture the imagination.

MAD

Since the inception of Make A Difference Leadership Foundation (MAD Leadership Foundation) in 2003, Founder and Chairman, Francois Pienaar has had an inspiring vision to provide educational access to deserving scholars with leadership potential (but who face economic and other barriers) through an individualised and personal approach. Therefore, MAD Leadership Foundation focuses on the whole individual, ensuring that our scholarship recipients not only succeed academically but manifest personal success and positive social engagement traits. Through the comprehensive, personal and long-term support we offer our scholars through our Scholarship Programme, we develop an alumni of MAD Leadership Foundation Fellows who will invest back into South Africa and who will be a powerful force for positive change in their unique way and leaders in their own right.

Edit Microsystems

Edit Microsystems (Pty) Ltd is an award-winning company that has supplied technology solutions to educational institutions, corporations and community upliftment projects throughout Southern Africa for over 28 years. The company is devoted to finding alternative and cutting-edge technology for learners of all abilities; to improve curriculum delivery with a focus on high speed functional connectivity, on-going support and professional development. Edit Microsystems (Pty) Ltd is the founding member of the Associated Distributors of Educational Supplies in Southern Africa (ADESSA). ADESSA is a body representing educational suppliers in their dealings with government departments, educational institutions and other interested parties.

British Council

Connecting Classrooms supports school systems globally through a range of professional development opportunities aimed at teachers and school leaders. The programme focuses on improving pedagogies and approaches around the key themes of core and transferable skills, school leadership and inclusive education, to enrich the learner experience and boost student performance. Connecting Classrooms introduces schools to the latest international practices, and it gives policymakers direct access to UK expertise and advice on education policy approaches.

Mzansi Kids App (Uyilo Studios)

The Mzansi Kids multilingual language learning App targets children between the ages of 2-6 years in South Africa. It was designed to stimulate visual, speech and language literacy skills at an early age by highlighting the correct pronunciation of speech in six different languages; English, Afrikaans, IsiXhosa, IsiZulu, Sepedi and Setswana. The integration of images and phonetics provides a good foundation for children to learn and speak with confidence and fluency, but most importantly comprehend and appreciate the diversity of languages used by South Africans. This App provides a good introduction before entering a schooling environment and offers a non-threatening, playful and fun way of learning languages using innovative technology.

After School Programmes

The After School Programme Office is a WCG-based team focused on building a movement of extended day education across no and low fee schools in the Western Cape. The office works in partnership with both government and non-government stakeholders to ensure that learners have access to comprehensive quality after school programmes. Programmes are offered across four pillars: Sport, Arts, Academic and Life Skills. The office focuses on building an enabling after school environment, developing practitioner and school management capacity, and nurturing partnerships while working to improve the quality and attractiveness of these programmes to learners. Through participation in after school programmes, the educational and opportunity gap is lessened, helping learners dream of their future life opportunities. In essence, it's more than just an After School Programme, it's an After School Advantage.

PLANT THE SEED

Plant the Seed

Plant the Seed is building services for schools to support them in becoming capable of producing future fit learners. We do this by offering educator and staff workshops and trainings; lesson plans and pre-design projects focused on innovation, sustainable development and project-based learning; and learner workshops and outings which immerse, engage and inspire them in the real-world.

Project CodeX

CodeX is a full-time, one year coding program that trains and places young talent as Software Developers. We're looking for problem solvers who have the aptitude and attitude to learn to code, whether you have matric, a university degree or already have work experience. Agile thinking. Software is not just about what you build, it's about how you build it. We give you the tools to manage your work – and your thoughts – the way much of the software industry does. CodeX aims to solve two of Africa's major challenges: youth unemployment and a critical programming skills gap.

School of IT

School of IT teaches coding to South Africans to empower them to achieve success, while showcasing our success stories.

D6 Group

d6 group is a wholly owned subsidiary of Open Learning Holdings, an investment holding company in the education industry. Open Learning Holdings also has 3 other investments, namely Fundi, Open Learning Group and UnitX. As an innovative technology-driven company, d6 group influences audiences in different sectors to ensure effective management and communication. Within the d6 group, three brands have been established in the group of companies, namely d6 education, d6 business and d6 media. These brands each have their own distinct attributes but remain focused on being at the forefront of technology-driven innovation.

Kingsley Technologies

We at Kingsley Technologies provide ISP services, as well as network devices that are involved in the networking process at prices affordable to everyone. We believe having open communications to the world around you is the best way for knowledge to spread and grow, and for this reason we strive to provide only the best connectivity solutions to the people of South Africa. This is especially important for the youth, as this is where the growth of our nation will happen.

Vitalium

Vitalium comprises all 20 amino acids required by people, in peptide form, along with essential electrolytes, minerals and organic iron in the form of heme. Vitalium is absorbed, not digested, which means that it retains its energy, its full functionality and there is virtually no overhead ingesting this vital source of nutrition.

Symphonia

Symphonia for South Africa's mandate is to mobilise active citizenship and build social fabric around the critical issues facing South Africa, and Partners for Possibility is our flagship programme through which we achieve this in the field of education. In addition, Symphonia SA does significant other work to enable deeper impact in each of the schools where Partners of Possibility has operated, and for the broader education sector as a whole. Partners of Possibility is a nation building programme, which partners business leaders with principals of under-resourced schools in co-action, co-learning thinking partnerships. Together they embark on an immersive and transformative leadership journey, to create a better future for children in South Africa.

Forest Heights Primary

At our school, we face challenges with learners in a community that are under the threat of violence, poverty, neglect, abuse, lack of affinity and misuse of drugs. Learners cannot express their feelings and will display anti-social behaviour, disrespect, learning difficulties, and much more.

We embarked on a music and art program where the identified learners came for an hour session per week, taking part in music appreciation and art which, will be linked to the curriculum. The results were amazing; learners could express themselves better, work within a group and absenteeism dropped drastically. Less violent episodes occurred, and learners had the awareness of themselves.

ICONIC

Iconic

Iconic is dedicated to education for everyone. In making a difference in education, Iconic would like to produce material that reduces the immense load on teachers, so that they can do their vital jobs of guiding young minds to be the best that they can be. Iconic has made every effort to keep the cost of books as low as possible so that more learners can access the strategies and skills. Our area of expertise as well as our passion is Mathematics, Language, and Life Skills.

Lightbulb Education

Lightbulb Education provides Learning Management solutions to schools. The LMS tools assist in content management and in improved learner engagement. In partnership with Tenacious Tutors, Lightbulb Education also provides online learner support for Mathematics, Physical Science, Life Science and Accounting subjects.

Computers 4 Kids

Computers 4 Kids is a 24-year-old company and over the years has trained over 6m learners and 30k teachers on our award winning South African e-Learner programme. e-Learner is an online programme that integrates classroom content with 21st century ICT skills. It is a unique way for learners to consolidate classroom content whilst having fun and learning at the same time. Computers 4 Kids specialises in the roll - out of Minecraft: Education Edition in schools. We offer a holistic solution including the setup of Office 365 and Minecraft: Education Edition, the curriculum content and full teacher training and support.

Of Course You Can

Of Course You Can (OCYC) is an online school for Graphic, Web, Digital, and Video Design, and is being adopted by Universities, Colleges and Schools across South Africa.

With the media world in its current state, we know that it's imperative that students have these skills to give them the competitive edge when reaching the job market. This goes for any student whether they want to get into the media design or not – having the know-how is just as important as having the skill! With our specialised 25 hour training journey, you will be able to: create graphics, banners, invites, websites, and videos speedily; have great insight on how to design for any situation, and what makes a great design; use super-fast applications like Adobe Spark and Adobe Rush to create amazing content on-the-go; understand the industry and how to work as a freelancer; and get exposure to 4 major disciplines in the creative industry with advanced knowledge of how they work on a software level.

Edupaths

Edupaths is an Education Company focusing on professional development of educators in the fields of ICT, coding and robotics integration, computational thinking, problem/ project-based learning. Our model involves showcasing best practice by educators in the field who are inspiring and engaging learners in their classrooms. We also assist with the setup of collaborative platforms such as O365 for Education and provide coaching for educators to implement the tools effectively to enhance teaching and learning. We offer a consultancy service to schools who are needing guidance regarding modern teaching and learning trends, collaborative and productivity platforms, devices and teacher development.

Rise School Communicator

Rise SA Business Solutions are software developers and system integrators. We offer full-on accounting & business management solutions for public & private education providers. We have developed Rise School Management, an all-in-one solution for schools with the school-specific accounting, batch invoicing, learner management & a school-parent communicator. We have also customized 1C Drive business management system to TSiBA Ignition Academy's unique requirements. Rise SA is an official South African partner of 1C International; a global software development company represented in over 25 countries with 5 million happy users. Our solutions are built on a 1c Enterprise platform with superior customization capabilities.

Green Shoots

Weekly, online, curriculum-aligned exercises and standardised, termly assessments provide immediate feedback for learners and dynamic visualisations of learning analytics for schools and District officials. Stakeholders are able to immediately identify learning barriers or systemic issues. A structured development programme supports data fluency and guides the implementation of interventions to impact curriculum delivery and learner support.

Light On Education

Renee Lighton is a consultant, SACE provider, author, speaker, life coach and Trained Demartini Method Facilitator. Her qualifications include a BA and Diplomas in Specialised Education, Foundation Phase and Montessori Pre-Primary education. Renee's experience includes ten years of classroom teaching and three years as a partner in an Educational training and distribution company. She believes in connecting, collaborating, creating and contributing. She offers workshops, online courses, Train – the Trainer programmes, product creation and coaching. Many schools, parents, Corporates, NGO's, Trusts and Foundations have benefited from her unique LightOn approach to education, personal development and transformation in SA and abroad.

Art Publishers

Adapted from African folklore tales, these delightful stories about our ever-intriguing South African Wildlife captures your imagination from the catchy Titles on the covers to the amazing illustrations inside. Our Range of Fictional Kids books tells us of “How the Zebra got its Stripes” to “How the Giraffe Became so Tall” making kids that would never get the opportunity to See these animals aware of their existence in South Africa and Africa as a whole, Art Publishers has over 20 years’ experience in the tourism and Curio industry in South Africa and have found that our local community are lacking so much knowledge on wildlife and we feel we found a good reading tool for South African educations foundation learning phase.

Global **MBD**
Africa Publishing

Global MBD Africa Publishing

Our head office, based in Cape Town, serves as the base for the entire African continent. With a truly South African team on board, we offer 360-degree education solutions under one roof. We aim to actively reach out to learners throughout the African continent, while advancing education by providing quality content. We share the vision of bringing continuous world-class content and cutting-edge technology to all learners in South Africa and Africa as a whole.

MBD Group (Parent company of Global MBD Africa Publishing):

Global MBD Africa Publishing is the South African Division of the MBD Group, India’s largest education service provider. MBD Group, our parent company is one of the leading education companies in India with over six decades of experience. We provide eLearning, M-learning, skills development, ICT Infrastructure and print educational products to our clients in India, South Africa, Kenya, Zimbabwe, Nigeria, Singapore, UAE, Sri Lanka and many other countries.

Shuter & Shooter

Shuter & Shooter Publishers (Pty) Ltd is a proudly South African publishing company. Established as a bookstore almost 100 years ago, we began publishing IsiZulu novels, poetry and textbooks from the early 1930s. Since then, we have been successfully producing quality literature and educational materials in all of South Africa’s official languages. We have a strong focus on developing textbooks for the core schools’ curriculum.

Shuter & Shooter Publishers has over 950 titles on the National Department of Basic Education’s textbook catalogue. All of these titles are in line with the Curriculum and Assessment Policy Statement (CAPS). We also have an extensive range of supplementary materials for schools to choose from.

In addition to our printed textbooks and resources, we also offer an extensive range of digital learning materials. These include e-book versions of our CAPS approved titles as well as a growing range of animated video lessons.

Shuter and Shooter Publishers is proud to be 100% black-owned and leading the transformation of educational publishing in South Africa. Our mantra is “Empowering our Nation through Education”.

Edit Microsystems

Edit Microsystems (Pty) Ltd is an award-winning company that has supplied technology solutions to educational institutions, corporations and community upliftment projects throughout Southern Africa for over 28 years. The company is devoted to finding alternative and cutting-edge technology for learners of all abilities; to improve curriculum delivery with a focus on high speed functional connectivity, on-going support and professional development. Edit Microsystems (Pty) Ltd is the founding member of the Associated Distributors of Educational Supplies in Southern Africa (ADESSA). ADESSA is a body representing educational suppliers in their dealings with government departments, educational institutions and other interested parties.

Juta

Juta Education specializes in publishing readers that focus on developing literacy through reading for comprehension. In addition to our CAPS approved readers we also support School Management and Teachers through our Juta Academic, Juta Law and Agency material which we select specifically for the value it adds to educators and school managers. We carry stock for international educational publishers and have consultants available in every Province offering guidance and training. Juta stands for learning and individual growth from the ECD phase up until graduation and further.

Oxford University Press

Oxford University Press South Africa is an educational publisher with over 100 years of experience in South Africa, publishing for schools and higher education. We recognise the power of education to uplift and equip individuals and communities to better their lives, and strive to develop high quality and affordable educational materials and support, based on the demands of learners, students, teachers and lecturers in South Africa.

Snapplify

Snapplify is at the forefront of edtech solutions in Africa, and specialises in enabling digital learning for individuals and institutions by establishing a marketplace for digital education content, related educational services, and devices. As a pan-African edtech company, Snapplify strives for radical inclusion to level the playing field and equip individuals across emerging markets with the world-class tools they need to collaborate, innovate and thrive. Since its establishment in 2012, the company has grown and expanded into new markets in Africa and the United States, with offices across South Africa, as well as in Nairobi, Amsterdam and New Jersey.

Tech360

CAMI MATHS is a fun, interactive and bilingual educational software system that helps 21st century learners understand mathematical concepts. The highly effective computer programs are CAPS aligned and provides learners in Grade R – 12 with unlimited exercises at various levels of difficulty. The exercises are automatically marked, and parents/teachers can monitor the learner's progress. The teacher can use the progress report to identify the areas in which learners did not achieve the desired results. The learner can then focus on these areas and improve their marks.

CAMI ADMIN keeps clear records of learner's progress while CAMI TRAINING provides training for teachers to help them get the most out of the CAMI SOFTWARE. The software is used extensively by schools, learning centres, universities (the University of Pretoria use it as a bridging programme), FET colleges, and other establishments in South Africa and internationally. CAMI software is wholly South African and has seen its use expanding to countries like Australia. We aim to ensure that every learner in every school and class receives quality Mathematics education. CAMI also offer CAMI Reader, CAMI Science, CAMI Literacy and CAMI Perceptual Skills Builder.

FunDza

The FunDza Literacy Trust is a South African nonprofit dedicated to improving literacy among teens and young adults between the ages of 13 - 25 years of age. Education provides the foundation for a healthy, stable, growth-oriented society; literacy is its cornerstone. We aim to popularise reading for enjoyment and writing for expression through a cell phone library found on fundza.mobi which hosts a whole list of content, from children's stories to online courses and a whole lot more besides. We believe that a reading nation is a winning nation.

Waltons

At Bidvest Waltons we believe in the opportunity and power of education. We are conscious of playing a valuable role in the economy of our country and our continent. We proudly supply the tools that facilitate the efficiency required for business success today as well as the items required for all learning environments. Bidvest Waltons stock a wide range of products that support all needs in these environment such as stationery, catering and hygiene, technology, office furniture, office and optiplan filing solutions. We deliver a diverse range of quality offerings at competitive price with exceptional service delivery. We want to be your partner in success, and commit to delivering on our promises and providing the best solution with focus, speed and efficiency. We invite you to browse through our products and solutions available online on www.waltons.co.za. We see ourselves as partnering with our clients, to offer them the best solutions.

Appshed

AppShed delivers key organisational tools that enable teachers to turn app development into a compelling teaching methodology. Anchor students' creativity into the heart of your lessons and manage and channel their aspirations with confidence

BrandMobi

With the ever increasing demand to ensure the legitimacy of the examination process, RSVP Mobi offers you an alternative secure portal to safeguard the registration process for all your exams. The platform allows you to send surveys to the scholars ahead of exams, confirming their identity and their eligibility to sit for exams. Once all survey questions are responded to in the appropriate manner a unique QR code is sent to the Scholar. This QR code is then scanned by the invigilators thereby ensuring the appropriate person is sitting in the exams. Immediately after the registration process and prior to the exam starting, the education institution is able to download a CSV file containing all the scholars who arrived to sit for the exam. It's an added level of security ensuring only the registered learner is able to sit for the exam.
