

GEOGRAPHY SG PAPER 2

GENERAL COMMENTS

- Candidates' handwriting MUST be legible.
- Candidates must read the questions VERY carefully.
- Knowledge of terminology such as the following is essential: *meanders, braided streams, central place, site, co-ordinates [grid reference], bearing, direction*
- General knowledge about the town of Clanwilliam was not accepted. All the necessary information was on the provided maps.
- **Map interpretation:**

It is clear that at certain centres map interpretation is being neglected.

More practice in integrated map reading is needed. No aspect of the theoretical work should be done without the help of a 1:50000 topographical map. Grade 12 mapwork should be the culmination of YEARS of practice. Furthermore, candidates MUST be able to apply their theoretical knowledge to a map.

- Candidates must pay careful attention to instructions.
- Candidates must be told that if two answers are given, the second one will be ignored.

COMMENTS ON SPECIFIC QUESTIONS

Question 1 Well answered.

Candidates were asked to use the correct letter, but some still wrote out the whole answer. A single choice had to be made – some made more than one choice. EXAMINATION WRITING TECHNIQUE MUST BE TAUGHT.

Question 2

- 2.1 The cross-section was not well done. Candidates must be more accurate in indicating the phenomena on the profile.
- 2.2 Very few candidates were able to supply the correct bearing. They should be trained in the use of a protractor. [North-east is an example of a **direction**, but a **bearing** is given in degrees.]

Question 3 Very poorly answered.

Candidates did not read and interpret the question properly. They gave the consequences and not the reasons for the erection of the dam wall at the site.

Question 4

Some candidates did not use both the topographical AND the orthophoto maps. They listed the differences and did not interpret the question correctly.

Question 5

- 5.1 Candidates' answers were too generalised. There are reasons why the town was sited at that place. Pasturage and building materials did not play a role.
- 5.2 Well answered. [The question read "in or near" the town – this excluded Leipoldt's grave 20 kilometres away. There is no indication of motor sport in the town – RENBAAN is the name of a settlement.
- 5.3 Candidates do not know that industries and factories are the same. Evidence for an industrial area: There are factories!

Fewer candidates achieved very low marks this year. Integrate and achieve!

AADRYKSKUNDE SG VRAESTEL 2

ALGEMENE OPMERKINGS

- Kandidate se handskrif MOET leesbaar wees.
- Lees die vrae BAIE versigtig deur.
- Terminologie: ken die terminologie, bv. meanders, vlegstome, sentrale-plek, standplaas, koördinate, (graad verwysings), peiling, rigting, ens.
- Algemene kennis oor die dorp Clanwilliam is nie aanvaar nie. Al die nodige inligting behoort vanaf die gegewe kaarte afgelei te word..
- **Kaart interpretasie:**
 - dit is baie duidelik dat sommige sentra kaartvaardighede afskeep. Meer oefening in geïntegreerde kaartlees word benodig. Geen aspek van die teoretiese werk behoort sonder die hulp van 'n 1:50000 kaart gedoen te word nie. Graad 12 kaartwerk behoort die kulminasie van JARE se oefening te wees,
 - kandidate MOET by magte wees om hul teoretiese kennis op die kaart toe te pas.
 - Aandag behoort gegee te word aan die inligting/vertaling gedeelte van die vraestel. Maak 'n keuse – indien twee antwoorde gegee word, sal die tweede een ignoreer word.

KOMMENTAAR OOR SPESIFIEKE VRAE

Vraag 1 Goed beantwoord.

Kandidate was gevra om die korrekte "letter" te skryf, maar het toe die hele antwoord geskryf. 'n Enkel keuse is gevra – sommige het nie. EKSAMEN TEGNIEKE BEHOORT ONDERRIG TE WORD..

Vraag 2

- 2.1 Die dwarsprofiel was swak gedoen. Kandidate moet die verskynsels akkuraat op die profiel aantoon.
- 2.2 Baie min kandidate was in staat om die korrekte peiling te verskaf. Hulle behoort geskool te word om 'n gradeboog te gebruik. [Noordoos is 'n voorbeeld van **rigting**, maar **peiling** word in grade aangedui.]

Vraag 3 Baie swak beantwoord.

Kandidate het nie die vraag deeglik gelees en geïnterpreteer nie. Hulle het die gevolge en nie die rede vir die bou van die damwal by daardie spesifieke standpaal gegee nie.

Vraag 4

Somige kandidate het nie beide die topografiese kaart en die ortofoto kaarte gebruik nie. Hulle het die verskille gelys en nie die vraag geïnterpreteer nie.

Vraag 5

- 5.1 Kandidate se antwoorde was te algemeen. Daar is redes waarom die dorp op daardie spesifieke standplaas is. Feite soos weiland en boumateriaal het nie 'n rol gespeel nie.
- 5.2 Goed beantwoord. [Die vraag lees "in of naby" die dorp – dus het dit Leipoldts se graf 20 km weg, uitgesluit]. Daat was geen aanduiding van motorsport in of naby die dorp nie – RENBAAN is die naam van 'n nedersetting.
- 5.4 Kandidate het nie geweet dat industrieë en fabriekes dieselfde is nie. Bewyse vir 'n industriële gebied : daar is fabriekes!

Minder kandidate het lae punte behaal. Integreer en presteer!!
