

ISIXHOSA SECOND LANGUAGE HG PAPER 3

This paper was just fair for these candidates. It was straight forward and the instructions were clear. What I can say to educators is these candidates needed to be taught thoroughly. This is a skill that can be used outside school that is in the work place.

For instance you can not go for an interview not knowing how to write it firstly.

Section A the questions were about every day life so in that note that was answered correctly.

Section B they must be taught thoroughly, I understand we are using standardisation in languages so some things are still new to us i.e. Reviews, E-mail etc.
