

## **METALWORK SG PAPER 1 AND 2**

**THEORY:** Compared to the results of last year, there was a definite improvement.

The design process is still a problem for most candidates. Sketches, illustrations and measurements needs more attention.

**DRAWING:** Question 3 was answered exceptionally well. Question 5: This section (solids/inclined/sections) needs more attention in future. It seems as though a lack of insight is the main reason.

---

## **METAALWERK SG VRAESTEL 1 EN 2**

**TEORIE:** In vergelyking met die vorige eindeksamen is daar beslis 'n verbetering in die uitslae.

Die ontwerpproses skep nog steeds probleme. Sketswerk/illustrasies en maatskrywing verg baie meer aandag.

**TEKENE:** Vraag 3 is baie goed beantwoord.  
5: Hierdie afdeling (regte meetkundige liggame/beweging/snitte) verg meer aandag. Dit blyk dat 'n gebrek aan insig die probleem kan wees.
