

SESOTHO HG PAPER 3

Our private Candidates need special attention on far as development of educational system is concerned in our country, because some of the candidates study without tutors/teachers due to the work condition and also the areas in which they live. Some of them are chance takers because they sometimes claim to be in matric without enough knowledge and early educational background. There's no prove of their standard and in most cases this is being over looked by the official conducting adult education. They approach their exams within ghost time depending on hearsay facts studies and stories.
