

PART B

Programme and sub-programme plans

10. Programme 1: Administration

10.1 Programme objective

To provide overall management of and support to the education system.

The Administration programme consists of the following sub-programmes:

Office of the Provincial Minister

- to provide for the functioning of the office of the Member of the Executive Council (MEC)

Corporate services

- to provide management services that are not education specific

Education management

- to provide education management services

Human resource development

- to provide human resource development for head office-based staff

10.2 Situational analysis

Quality Assurance and Accountability

The demand for improved efficiency in the education system requires that a strong accountability system and process be introduced into the WCED. Systemic Evaluation, School Self-Evaluation (SSE) and Whole School Evaluation (WSE), as well as tracking, reporting and accountability measures, are all instruments to be used to advance the objective of heightened accountability measures throughout the system.

- Systemic Evaluation

Systemic Evaluations at Grade 3 and 6 levels are conducted by the Department of Education across South Africa every alternative year. These evaluations are intended to assess the extent to which the education system has managed to achieve social, economic and transformation goals by measuring learner performance within the context in which they experience learning and teaching programmes. The outcomes of these assessments are used to inform interventions. The Grade 3 Systemic Evaluation Report (2002) indicates reason for concern on the numeracy and literacy skills of learners, barriers to full access to educational services for disadvantaged learners, poor achievement of equity goals and a major concern about the overall quality of education in relation to such indicators as the quality of teaching, overcrowded classrooms, ineffective use of contact time in the classroom and unsafe conditions at schools. The Grade 6 systemic evaluation was conducted in 2004 and the results are expected in 2005.

- School Self-Evaluation (SSE) and Whole School Evaluation (WSE)

Starting with an honest appraisal of their own systems and practices, schools will be required to develop focused and realistic School Development Plans that will outline the key strategies they will launch to improve on identified areas of weakness. The WSE process will then periodically monitor and assess schools' achievements of their development strategies.

- Integrated Quality Management System (IQMS)

The Collective Agreement 8 of 2003, signed in August 2003, sets out the nature and implementation rules for the IQMS. The IQMS links the Whole School Evaluation, the identification of development needs of individuals and the performance appraisal of individual educators. According to the collective agreement, every educator first has to be trained in the system.

- Employee Wellness Programme (EWP)

A service provider, Careways, delivers the EWP service in the WCED. The service is primarily a telephonic counselling service, with the possibility of face-to-face counselling when required. The EWP is intended primarily to be preventative; this means that staff and supervisors are encouraged to make use of the call centre service when problems begin.

The service provider supplies the WCED with a monthly report on the number of calls as well as the major categories of concern of staff. It is hoped that the availability of such a professional service will, in itself, reduce absenteeism because staff will be helped to find and implement solutions for their problems.

As a pilot, the Directorate: Human Resource Development will work with the following categories in order to determine the impact that principal intervention can have if the EWP service is used:

- 10 schools with the worst absentee / stress leave record
- 10 staff members with the worst random absence record
- 10 staff members who show certain absentee trends (e.g. Monday, Friday)

The principals of these schools will be put on a special training programme to equip them to deal with these and to refer staff to the EWP service.

- Reporting and Accountability Measures

The WCED is subject to a wide range of accountability processes. These include the following:

- Auditing of financial management processes on an annual basis, by the provincial Auditor-General's office;
- Appearances at regular sessions with the Education Portfolio Committee and the Standing Committee on Public Accounts in the Provincial Parliament;
- Meetings (or road shows) with various education stakeholders at regular intervals by the Minister and the Superintendent-General to share information about the latest developments in education, or simply to hear about problems experienced by educators and school managers; and
- The WCED is already under obligation to submit an annual report on its activities to the Legislature. The Annual Report document can be accessed by the broader public and allows for the education community to monitor the achievements or failures of the department, in relation to its legislative and policy mandates and its strategic plans.

Communication

An important management and accountability tool for big organisations such as the WCED is rapid and effective communication. To this end the WCED will expand and improve its Client Service through an effective and user-friendly call centre, web sites and circulars.

The WCED's ICT Strategy, the Khanya Project, the Dassie Project, the Telecommunications Project and the WCED website, which includes the Curriculum, Edulis and Edumedia sites, are informed and influenced by:

- the national White Paper on e-Education;
- the Provincial Knowledge Economy and e-Governance Strategy; and
- the City of Cape Town's ICT strategy.

Most importantly, however, the WCED will develop its internal capacity, especially among teachers, to prepare for the use of curriculum digital content.

10.3 Policies, priorities and strategic objectives

Table: Strategic objectives for Programme 1: Administration

Strategic Goal	Strategic Objective
To promote accountability on all levels, in line with the legislative mandate.	<ul style="list-style-type: none"> • To promote co-operative governance. • To align policy and practice to the government's strategic objectives and the legislative mandate. • To promote effective evaluation and quality assurance management systems. • To encourage awareness of the rights and responsibilities of all role-players in education, including learners, parents, educators, school management, school governing bodies and WCED officials at all levels. • To foster a culture of teaching and learning in schools and colleges, and a commitment to life-long human resource development. • To play an active role in meeting the broader needs of the country, especially in dealing urgently and purposefully with the issue of HIV/AIDS and Life Skills. • To bring about effective management at all levels of the system.
To promote organisational efficiency and effectiveness.	<ul style="list-style-type: none"> • To develop a creative and resilient management echelon. • To build strong policy systems and capacity within the WCED. • To design effective communication systems for access by the education community (internal and external). • To build district capacity, service and support. • To implement Batho Pele principles. • To respond to customer needs effectively. • To put effective financial management systems in place. • To realise an optimal distribution of financial, physical and human resources across the system. • To ensure that the flow of learners through the system is optimal.
To establish a quality assurance function in the WCED.	<ul style="list-style-type: none"> • To establish targets in relation to human resource development and report on progress on targets. • To ensure systemic accountability with introduction of Systemic Evaluation, School Self Evaluation (SSE), School Development Plans (SDP) and Whole School Evaluation (WSE). • To build management capacity in offices and schools. • To develop norms and standards for the delivery of all services.

10.4 Analysis of constraints and measures planned to overcome them

The integration of the various quality assurance and accountability measures introduced is a serious challenge to the WCED. It is important to ensure that these measures lead to improved teaching and learning and are not seen as ends in themselves.

10.4 Description of planned quality improvement measures

Ongoing interventions regarding the training of school management team (SMT) members include managing curriculum, discipline, women in leadership, policy management, latest amendments to acts and signed resolutions.

10.5 Resourcing information

None at this stage.

11. Programme 2: Public Ordinary School Education

11.1 Programme objectives

To provide public ordinary education from Grades 1 to 12 in accordance with the South African Schools Act, 1996.

The Public Ordinary School Education programme comprises the following sub-programmes:

Public primary schools

- to provide education for the Grades 1 to 7 phase at public primary ordinary schools

Public secondary schools

- to provide education for the Grades 8 to 12 levels at public secondary ordinary schools

Professional services

- to support public ordinary schools

Human resource development

- to provide for the professional development of educators and non-educators in public ordinary schools

11.2 Situational analysis

General Education and Training (GET) (Grades 1-9)

Data from the 2001 Census and the WCED EMIS indicate that there are very high enrolment rates in the age group 6 – 15 (Grades 1 - 9). In addition, the age-grade match in the Western Cape is high. However, studies conducted in the Western Cape in the last five years suggest that learner achievement is below what is expected in Grades 1 - 9. This is true both in relation to other countries (including other developing countries) and in relation to the expectations of the South African curriculum. For example, in 2002, the WCED assessed the reading and numeracy results of the Grade 3 learners in all schools. This study found that only 36% of learners are achieving the reading and numeracy outcomes expected in Grade 3. The vast majority of learners are achieving two to three years below expectation.

To address this problem diagnostic testing will take place at the end of the Foundation Phase and Intermediate Phase, that is, Grades 3 and 6 every alternative year beginning with Grade 3 in 2002. The diagnostic testing will be used not only to identify areas for intervention but will also be used to measure progress in the system over time. These tests will be used to -

- develop interventions and strategies
- set targets for schools, districts and the province.

The diagnostic testing conducted in 2002 and 2003 indicates that the results of the test are highly correlated to poverty. For this reason the province will plan a holistic approach to supporting the development of poor learners. This holistic approach includes the PSNP. The administration of the PSNP, which is part of the national school nutrition programme conditional grant, was shifted from the Department of Health during 2004. This shift to the department will improve planning, enhance co-ordination and further contribute to more efficient feeding in schools.

Grade 9 is the end of the GET Band. After this grade learners choose FET programmes. In order to promote relevant and appropriate FET programme choice all Grade 8 learners will be assessed every year.

Further Education and Training (FET) Grades 10 -12

FET is a specialisation phase. It is the first phase of the education system in which learners must make choices about the subjects or programmes they will offer.

The current FET curriculum is based on Report 550 for Grades 10 to 12; Report 191 (Formal Technical College Instructional Programmes in the RSA) and Report 190 (Norms and standards for instructional programmes and the examination and certification thereof in technical colleges education). These curriculum and programme offerings will be replaced in the period 2004 to 2008 by a framework that offers 16 - 20 year olds more flexible and responsive education and training programmes. The framework for FET offers three pathways to the Further Education and Training Certificate (FETC) or National Qualifications Framework (NQF) Level 4 certificates, namely:

- General academic
- General vocational
- Occupational – trade, operational, professional

This means that Report 550 and Report 191 programmes will gradually be phased out and relevant qualifications and programmes will be phased in. In schools the new National Curriculum will be introduced into Grades 10 - 12 from 2006 to 2008. The number of subjects offered in the FET schools curriculum has been greatly reduced but the subjects are more focussed and relevant. The province will have to actively drive a process of curriculum redress to ensure that in all districts the full range of subjects is offered. This will require careful planning and strong redress action.

The curriculum redress process must be supported by a systematic redress programme, which provides equipment (especially computers) and specialist teachers to disadvantaged areas. The WCED has begun this redress process in the fields of maths and science and other 'focus' schools will be developed in the FET band.

School Safety

As is the case elsewhere in the world, school safety is becoming an increasing concern of government. The Western Cape is particularly plagued in this regard as it experiences the serious problems of gangsterism and gang violence and the accompanying scourge of alcohol and substance abuse. Together with a range of partners, but in particular the Department of Community Safety, these issues are being tackled head-on.

The Safe Schools Programme has a three-pronged strategy, which includes the following:

- A Safe Schools Call Centre, where various problems can be reported, and where affected and traumatised individuals can also request, and receive, counselling
- Provision of physical security: this programme focuses on the installation of various safety measures, including security fencing and security alarms at high-risk schools. The programme also includes survival strategies.
- Educational programmes focusing on values and attitudes, the goal of which is to re-direct learners' interests into more positive pursuits such as sports, arts and drama, and focusing on future careers.

11.3 Policies, priorities and strategic objectives

Strategic objectives for Sub-programme 2.1: Public primary phase

Strategic Goal	Strategic Objective
To ensure access to quality education for all children living in the province.	<ul style="list-style-type: none"> • To provide learner accommodation in the public primary phase in line with policy. • To provide the basic infrastructure for primary schools in accordance with policy • To improve access to education for learners from previously marginalised groups • To provide relevant and structured training to teachers on the National Curriculum • To improve learner performance in numeracy and literacy • To improve efficiency in the education system and to improve the pass-through rate of pupils and the quality of education as a whole over time. • To promote effective and inclusive education for learners with special education needs. • To provide transport and hostel facilities for needy learners • To provide a primary school nutrition programme (PSNP) • To restore school discipline.
To ensure effective e-Learning in schools	<ul style="list-style-type: none"> • To accelerate ICT infrastructure provision for all schools. • To ensure curriculum delivery through the use of ICT. • To ensure digital content development and management. • To ensure that educators are trained in the use of ICTs to support their teaching programmes
To ensure safe institutional environments required for effective teaching and learning	<ul style="list-style-type: none"> • To promote a safe school environment in partnership with communities and other government departments. • To end conditions of physical degradation of learning sites. • To promote understanding of social conditions in the province and how these affect schools.

Strategic objectives for Sub-programme 2.2: Public secondary phase

Strategic Goal	Strategic Objective
To ensure access to quality education for all children living in the province.	<ul style="list-style-type: none"> • To provide learner accommodation in the public secondary phase in line with policy. • To put the basic infrastructure for secondary schooling in place in accordance with policy. • To increase the number of FET learners enrolled in appropriate programmes at schools especially learners from previously marginalised groups. • To increase the number of learners successfully completing their education in the FET band. • To increase the number of learners that obtain a school leaving certificate that allows access to higher education • To increase participation and success rates in maths and science • To promote effective and inclusive education for learners with special education needs.
To ensure effective e-Learning in public secondary schools	<ul style="list-style-type: none"> • To accelerate ICT infrastructure provision for all schools. • To ensure curriculum delivery through the use of ICT. • To ensure digital content development and management. • To ensure that educators are trained in the use of ICTs to support their teaching programmes

Strategic Goal	Strategic Objective
To ensure safe institutional environments required for effective teaching and learning	<ul style="list-style-type: none"> • To promote a safe school environment in partnership with communities and other government departments. • To end conditions of physical degradation of learning sites. • To promote understanding of social conditions in the province and how these affect schools.

Strategic objectives for Sub-programme 2.3: Professional services

Strategic Goal	Strategic Objective
To ensure effective management and governance in all the learning sites and support structures	<ul style="list-style-type: none"> • To bring management and governance support and development closer to schools through the work of the EMDCs and other professional services. • To achieve an optimal and equitable distribution of financial, physical and human resources across the system. • To improve the knowledge and skills of school principals through targeted training and support. • To improve the knowledge and skills of school governing bodies through targeted training and support. • To improve management of the curriculum and assessment processes. • To improve financial management and quality enhancement at all levels in line with provincial policy and the legislative framework. • To provide professional support to all public ordinary schools.

Strategic objectives for Sub-programme 2.4: Human resource development

Strategic Goal	Strategic Objective
To equip and support educators in their efforts to provide effective education	<ul style="list-style-type: none"> • To provide educators at the public primary and secondary phases in accordance with policy. • To ensure that the province employs sufficient numbers of appropriately trained educators. • To support efforts to recruit student teachers to pre-service training institutions. • To develop the professional quality of the teaching force, through ongoing professional support. • To develop the potential of media and technology (e-education and ICT) so as to enhance teaching and learning and to provide curriculum support. • To equip educators to ensure effective curriculum development, delivery and support. • To launch focused educator development programmes through the Cape Teaching Institute (CTI). • To provide specialised education support to teachers.

Strategic objectives for Sub-programme 2.5: Primary school nutrition programme

Strategic Goal	Strategic Objective
To provide identified poor and hungry learners in primary schools with the minimum food they will need to learn effectively in school	To provide 149 000 identified poor and hungry learners in 866 primary schools with the minimum food they will need to learn effectively in school.

11.4 Analysis of constraints and measures planned to overcome them

The growth in the number of secondary school learners in the Western Cape and the use of vacant primary school buildings, which have no laboratories, as secondary schools, have caused the percentage increase in the number of secondary schools without laboratories. Platooning schools will also increase the number of secondary schools without laboratories.

11.5 Description of planned quality improvement measures

The WCED has introduced a number of interventions and projects in an effort to address various aspects of quality education in schools. Amongst others, the projects and interventions in operation in schools include the following:

- To encourage positive learner behaviour: The focus here is to initiate development workshops for teachers in order to assist them to understand learner behaviour and peer pressure and assist them to deal with behavioural issues in a new way.
- Identification of dysfunctional schools: Multi-functional teams identify the problems experienced by these schools; devise a strategy to address the problems under the leadership of a project leader; where necessary the support of outside organisations is enlisted; departmental training programmes are offered to the school; continued failure can lead to mentorship/curatorship at those schools; if failure continues reconstitution of the school may be implemented.
- Multi-grade Intervention: To support schools that teaches more than one grade per class in their teaching methods. Emphasis is placed on the utilisation of ICT to support effective multi-grade instruction.
- Early Enrolment Campaign: Encourages schools to start the enrolment of learner process early in the year for finalisation by the end of the year; completion of time-tables and nominations for appointment of teachers in order for schools to start tuition on the first day of the new school year; identifying "hot spots" with regard to accommodation so that contingency plans can be put in place.
- Over-age learners: The number of over-age learners in the system is being reduced gradually, as no over-age learners are admitted into the system. Those who are already in the system are encouraged to register at ABET Centres. (Please Note: These are learners that are 20 years and older).
- Inclusive education: Education White Paper 6 indicates how the current special education system should be transformed into an inclusive education and training system. It spells out, amongst others, how mainstream schools should be developed into full services schools that will be able to accommodate learners that need moderate support; how special schools should be developed into resource centres for mainstream schools; the development of district support teams; and the development of institutional support teams.
- Focused literacy and numeracy strategies for Foundation Phase and Intermediate Phase that includes -
 - providing 100 books to every Foundation Phase (Grades 1 - 3) and Intermediate Phase (Grades 4 - 6) class in the province;
 - providing mathematics textbooks to all Grade 3 to 6 learners;
 - providing examples of 36 week work schedules;
 - monitoring on a weekly basis learning progress through officials dedicated to each school that offers Grades 1 to 6; and
 - monitoring learner access and learner acquisition of the intended curriculum through reading and mathematics testing of Grades 3 and 6.

The EMDCs and their different structures visit all educational institutions and assist them with capacity building in terms of different scenarios and actions that need to be done, e.g. appointing new governing bodies, financial matters, curriculum, etc.

11.6 Resourcing information

The statistical information regarding the number of learners and educators is obtained from the WCED's Annual Survey and 10th day statistics.

There has been an increased in migration to the Western Cape, but additional classrooms completed during 2002/03 and 2003/04 assisted in keeping the learner:classroom ratio envisaged, in check.

The spending of available funds for new construction projects did not progress as intended. However, over 200 additional maintenance projects were completed. This had a large impact on the percentage infrastructure budget spent on maintenance.

Grades 1 – 12 in public ordinary schools are resourced with educator staff determined according to the Post Provisioning Model, non-educator personnel as well as non-personnel funding determined according to the Norms and Standards Funding for Schools, both based on poverty rankings.

12. Programme 3: Independent school subsidies

12.1 Programme objective

To support independent schools in accordance with the South African Schools Act, 1996.

The Independent School Subsidies programme comprises the following sub-programmes:

Primary phase

- to support independent schools in the Grades 1 to 7

Secondary phase

- to support independent schools in the Grades 8 to 12

12.2 Situational analysis

There are currently 180 independent schools in the Western Cape. These schools accommodate a range of learners from varied socio-economic backgrounds and are important and valued partners in education delivery in the province.

The WCED provides subsidies to 75 independent schools, which provide learning opportunities to disadvantaged learners in the province.

12.3 Policies, priorities and strategic objectives

Strategic objectives for Programme 3: Independent school subsidies

Strategic Goal	Strategic Objective
To ensure access to quality education for all children living in the province.	To support independent schooling that serves poorer communities on a sliding scale as a complement to public schooling.

12.4 Analysis of constraints and measures planned to overcome them

A few independent schools have very poor records in the systemic testing at Grade 3 and 6 levels and in Grade 12. There are also regular complaints from pupils and parents. The WCED plans to deal decisively with these schools and ensure that they are de-registered if they fail to provide quality education.

12.5 Description of planned quality improvement measures

The throughput and output of independent schools receiving a subsidy is closely monitored and subsidies are adjusted accordingly.

12.6 Resourcing information

All independent schools that are registered with the WCED are eligible, depending on the Norms and Standards Funding for Independent Schools, to receive subsidies equal to 60% of the cost per learner in the public schools. All independent schools that apply for a subsidy, and are eligible for funding in terms of the Norms and Standards policy, receive a subsidy.

13. Programme 4: Public special school education

13.1 Programme objective

To provide public education in special schools in accordance with the South African Schools Act, 1996 and White Paper 6 on inclusive education.

The Public special school education programme consists of the following sub-programmes:

Schools

- to provide education at public special schools

Professional services

- to support public special schools

Human resource development

- to provide for the professional development of educators and non-educators in public special schools

13.2 Situational analysis

Education White Paper 6 indicates how the current special education system should be transformed into an inclusive education and training system. It spells out, amongst others, how mainstream schools should be developed into full services schools that will be able to accommodate learners that need moderate support; how special schools should be developed into resource centres for mainstream schools; the development of district support teams; and the development of institutional support teams.

13.3 Policies, priorities and strategic objectives

Strategic objectives for Sub-programme 4.1: Schools

Strategic Goal	Strategic Objective
To ensure access to quality education for all children living in the province.	<ul style="list-style-type: none">• To provide spaces in public special schools in accordance with policy and the principles of inclusive education.• To improve access to public special school education for learners from previously marginalised groups.• To provide psychological, social, medical, therapeutic and learning support to learners.• To promote effective and inclusive education for learners with special education needs.• To ensure that the flow of learners through public special schools is optimal.• To attain the highest possible educational outcomes amongst public special school learners.

Strategic objectives for Sub-programme 4.2: Professional services

Strategic Goal	Strategic Objective
To ensure effective management and governance in all the learning sites and support structures.	<ul style="list-style-type: none">• To bring management and governance support and development closer to schools through the work of the EMDCs and other professional services.

Strategic Goal	Strategic Objective
	<ul style="list-style-type: none"> • To achieve an optimal and equitable distribution of financial, physical and human resources across the system. • To improve the knowledge and skills of school principals through targeted training and support. • To improve the knowledge and skills of school governing bodies through targeted training and support. • To improve management of the curriculum and assessment processes. • To improve financial management and quality enhancement at all levels in line with provincial policy and the legislative framework. • To provide professional support to all public special schools.

Strategic objectives for Sub-programme 4.3: Human resource development

Strategic Goal	Strategic Objective
To equip and support educators in their efforts to provide effective education	<ul style="list-style-type: none"> • To provide educators at the public special schools in accordance with policy. • To ensure that the province employs sufficient numbers of appropriately trained educators. • To support efforts to recruit student teachers to pre-service training institutions. • To develop the professional quality of the teaching force, through ongoing professional support. • To develop the potential of media and technology (e-education and ICT) so as to enhance teaching and learning and to provide curriculum support. • To equip educators to ensure effective curriculum development, delivery and support. • To launch focused educator development programmes through the Cape Teaching Institute (CTI). • To provide specialised education support to teachers.

13.4 Analysis of constraints and measures planned to overcome them

There is a significant increase in the number of referrals of learners with barriers to learning for placement in special schools. The greatest need is for placement of learners in youth centres and schools of skills. Attention is being given to the rationalisation of services with a view to accommodate the needs of the WCED.

13.5 Description of planned quality improvement measures

The EMDCs and their different structures visits the special schools and help them with capacity building in terms of different scenarios and actions that need to be done, e.g. appointing a new governing body, financial matters, implementing the IQMS, etc. Ongoing interventions regarding the training of SMT members include managing curriculum, enhancing positive behaviour, women in leadership, policy management, latest amendments to acts and signed resolutions.

The transforming of special schools into resource centres, in line with Education White Paper 6, contributes to an increase in the support rendered to learners with special education needs in mainstream schools. In-service training is provided for EMDC support staff. CS Educators at Youth Centres (Basic Qualification in Secure Care), therapists and social workers.

13.6 Resourcing information

The pass rate is excellent for the learners at special schools. Five schools have a 100% pass rate. The pass rate is higher than those for the mainstream schools.

Learners from the Schools of Skills tend to get jobs more easily than those in other special schools and even mainstream schools. However, factors like the current economic climate and the inaccessibility of the labour market plays an important inhibiting role.

All public special schools are funded by determining a per capita allocation that takes into account learner numbers and the weightings in terms of the disability categories. This allocation also includes funding for LTSM, assistive devices and the adaptation of physical facilities to accommodate the mobility of learners as well as the provision of specialised transport. Furthermore, funding for class assistants and bus drivers are allocated to schools according to a per capita subsidy in terms of policy.

14. Programme 5: Further education and training

14.1 Programme objective

To provide FET at public FET colleges in accordance with the Further Education and Training Act, 1998.

The FET programme comprises the following sub-programmes:

Public institutions

- to provide specific public FET colleges with resources

Professional services

- to support public FET colleges

Human resource development

- to provide for the professional development of educators and non-educators in public FET colleges

14.2 Situational analysis

Thirteen FET colleges have been merged into six mega institutions and CEOs have been appointed to manage the six institutions. Ongoing support is required for the restructuring process. In particular it will be necessary to develop systems, procedures, programmes and infrastructure for increased numbers of learners.

The FET college curriculum is being redesigned and developed. The introduction of the new curricula requires considerable redesign of the organisation and management of FET institutions. The WCED initiatives in this programme are all designed to support curriculum / programme development and implementation and institutional restructuring. These include -

- **Teacher development:** In order to provide relevant quality programmes, educator development interventions will upgrade mathematical literacy and mathematics skills, integrate theory and practice, provide work place experience, and upgrade academic and professional qualifications. The DANIDA-sponsored Support to Education and Skills Development (SESD) Project will support the delivery of practical and labour market oriented education and skills training. Colleges will gain the capacity to develop accredited and certified training programmes.
- **Physical Resources:** Vocational Education and Training is resource intensive by nature. Specialised workshops that carry industry accreditation are required for effective HRD. If FET colleges are to increase in size fivefold over the next seven or eight years, major investment will be required in buildings, equipment and personnel.
- **Learner Support:** this entails recruitment and advocacy, recognition of prior learning, programme placement, financial and academic support and job placement and tracking.
- A variety of delivery modes such as e-learning, distance learning, learnerships, skills programmes will be used to deliver these programmes. The DASSIE project is key to expanding these delivery mechanisms.

14.3 Policies, priorities and strategic objectives

- To promote access to FET colleges
- Articulation between GET and Higher Education
- Develop and maintain a FET college curriculum strategy and supportive structures

- Developing new learning programmes responsive to the needs of the economy and community needs.

Strategic objectives for Sub-programme 5.1: Public institutions

Strategic Goal	Strategic Objective
To ensure access to quality FET college education for all in the province.	<ul style="list-style-type: none"> • To provide learner accommodation in FET colleges in accordance with policy. • To improve knowledge of and access to FET college education for learners from previously marginalised groups. • To increase the number of FET learners enrolled in appropriate programmes at colleges especially learners from previously marginalised groups. • To promote the development of programmes that are responsive to the social and economic needs of the province. • To provide loans to learners from poor backgrounds who wish to study at FET colleges. • To create learner support units at each college to assist recruitment, support and placement

Strategic objectives for Sub-programme 5.2: Professional services

Strategic Goal	Strategic Objective
To ensure effective management and governance in all the learning sites and support structures.	<ul style="list-style-type: none"> • To achieve an optimal and equitable distribution of financial, physical and human resources across the system. • To improve the knowledge and skills of FET chief executive officers (CEOs) through targeted training and support. • To improve the knowledge and skills of FET college councils through targeted training and support. • To improve management of curriculum and assessment processes. • To improve financial management and quality enhancement at all levels in line with provincial policy and the legislative framework. • To provide professional support to all public FET colleges.

Strategic objectives for Sub-programme 5.3: Human resource development

Strategic Goal	Strategic Objective
To equip and support educators in their efforts to provide effective education	<ul style="list-style-type: none"> • To provide educators at FET colleges in accordance with policy. • To develop the professional quality of the teaching force, through ongoing professional support. • To develop the potential of media and technology (e-education and ICT) so as to enhance teaching and learning and to provide curriculum support. • To equip educators to ensure effective curriculum development, delivery and support.

14.4 Analysis of constraints and measures planned to overcome them

The rate of growth of full-time equivalents (FTE's) in FET colleges is constrained only by resources e.g. staff, equipment, finance etc. Indications are that targets will be reached as additional enrolments are recorded in the 2004/05 financial year. FET colleges offer courses, which range from a few hours to years in terms of duration. Learner enrolment is therefore ongoing. Audited FTE's for the preceding year are only available from April in the subsequent year as these are subject to complex calculations and auditing by external auditors along with the financial statements of the college concerned.

14.5 Description of planned quality improvement measures

Targeted programmes will enable educators at colleges to:

- Upgrade mathematical literacy and mathematics skills
- Upgrade their academic and professional qualifications
- Assess learning to meet Umalusi and SETA standards.
- Deal with barriers to learning.

Colleges will establish learner support units to accommodate and provide support for the vast variety of learners with different learning backgrounds and experiences. Learner tracking will be done to support learners in curriculum and work placement. Colleges will also develop strategies to broaden access to FET colleges such as -

- A variety of delivery modes (e-learning, distance learning, learnerships, skills programmes, etc.)
- Facilities and training that meet the needs of differently-abled learners
- New sites for the disadvantaged and rural communities
- Bursary schemes and Recognition of Prior Learning (RPL)

The credibility and value of qualifications achieved at FET colleges will depend on the quality of their programme offering. Colleges will develop and apply quality management systems in order to measure and improve the quality of academic programmes and non-academic processes.

14.6 Resourcing information

Participation of adults, assuming adults to be 21 years old and older, will increase as more learnerships are introduced.

FET Colleges are resourced with the provision of educator personnel determined according to the Post Provisioning Model, non-educator personnel as well as subsidies for rates and taxes, physical infrastructure acquisition and development as well as ad hoc (targeted) subsidies.

15. Programme 6: Adult basic education and training

15.1 Programme objective

To provide ABET in accordance with the Adult Basic Education and Training Act, 2000.

The ABET programme comprises the following sub-programmes:

Subsidies to private centres

- to support specific private ABET sites through subsidies

Professional services

- to support ABET sites

Human resource development

- to provide for the professional development of educators and non-educators at ABET sites

15.2 Situational analysis

In 2003 10 000 learners were enrolled on courses at the GET level. 6 000 learners were enrolled on ABET Level 1 and 2 courses and 4 000 on ABET Level 3 and 4 courses. However, over 1,5 million people living in the Western Cape have less than a GETC or related qualification. Clearly the WCED cannot hope to address the education needs of this magnitude alone and will require the assistance of partners.

The WCED is involved in a number of partnerships with government departments and corporations. Through these partnerships, employees of provincial departments are given the opportunity to obtain a GETC. Draft guidelines for the implementation of partnerships were developed in 2004. These guidelines include, amongst other, phases in the implementation of a partnership, roles and responsibilities of those involved, costs and cost drivers.

In addition partnerships have been formalised through Memorandums of Understandings. Both parties, i.e. the WCED as the service provider and the partner (e.g. provincial department), sign this Memorandum of Understanding.

Partnerships contribute significantly to the number of learners in CLCs. The appointment of more full-time Centre Managers (CM) and Site Co-ordinators (SC) and the fact that the contracts of some CMs and SCs are renewable will ensure stability in many CLCs. This ensures improved planning, management and governance of CLCs. The support and guidance rendered by, in particular, ABET officials in the EMDCs assist CLCs in becoming more responsive to the needs of the communities they serve and ensure an increase in learner numbers.

15.3 Policies, priorities and strategic objectives

Provision will be made for 2 500 new learners per annum to access ABET. This will be provided through the following:

- Purpose-driven ABET level 1, 2 and 3 curricula – consisting of two programme offerings, namely numeracy and literacy, offered in all community learning centres
- Level 4 Centres offering a selection of learning areas that lead to a purposeful GETC qualification for the learner in the context of the community
- Provision of physical and financial resources to support the ABET curriculum
- All CLCs receiving a computer and printer

- All existing educators receiving targeted training and all new educators receiving orientation and training
- All CLC managers receiving appropriate training (technical skills and personal development plans) on an ongoing basis

Strategic objectives for Sub-programme 6.1: Subsidies to public centres

Strategic Goal	Strategic Objective
To improve access to ABET and adult skills development in line with policy.	<ul style="list-style-type: none"> • To increase the number of learners, especially women, rural and poor learners, enrolled on ABET and Adult Further Education and Training (AFET) courses at Community Learning Centres (CLCs) by a minimum of 2 500 each year. • To develop and offer purpose-driven ABET and AFET qualifications. • To develop partnerships with other government departments, sectoral education and training authorities (SETAs) and non-governmental organisations (NGOs) in the delivery of ABET and AFET courses. • To increase the number of adult learners successfully completing their qualifications in the ABET and FET bands.

Strategic objectives for Sub-programme 6.2: Professional services

Strategic Goal	Strategic Objective
To ensure effective management and governance in all the learning sites and support structures.	<ul style="list-style-type: none"> • To bring management and governance support and development closer to CLCs through the work of the EMDCs and other professional services. • To achieve an optimal and equitable distribution of financial, physical and human resources across the system. • To improve the knowledge and skills of CLC managers through targeted training and support. • To improve the knowledge and skills of governing bodies through targeted training and support. • To improve management of the curriculum and assessment processes. • To improve financial management and quality enhancement at all levels in line with provincial policy and the legislative framework. • To provide professional support to all ABET sites.

Strategic objectives for Sub-programme 6.3: Human resource development

Strategic Goal	Strategic Objective
To equip and support educators in their efforts to provide effective education.	<ul style="list-style-type: none"> • To develop the professional quality of the teaching force, through ongoing professional support. • To develop the potential of media and technology (e-education and ICT) so as to enhance teaching and learning and to provide curriculum support. • To equip educators to ensure effective curriculum development, delivery and support.

15.4 Analysis of constraints and measures planned to overcome them

Unlike public schools or mainstream exams, learners in CLCs cannot obtain a GETC through one sitting for the ABET Level 4 exam. Learners achieve the requested credits over a period of time of at least two to three years. Once a learner obtains the 120 credits required, a GETC can be issued by UMALUSI. Consequently the numbers of GETCs issued (actual performance) is relatively low compared to the target set. Furthermore, learning area certificates are issued when learners successfully complete a learning area.

15.5 Description of planned quality improvement measures

- Develop a purpose-driven ABET level 1 – 4 curriculum, which provides regular opportunities for assessment.
- Level 4 Centres developed to offer a selection of learning areas that lead to a purposeful GETC qualification for the learner in the context of the community.
- Programmes for FET colleges, as appropriate, are offered in Community Learning Centres that offer FET.
- A training and development model for staff at ABET centres will be established and implemented. The model will ensure that all existing educators receive targeted training and all new educators receive orientation and training and development.
- Centres located at schools have access to the required physical resources to ensure effective curriculum implementation (implement minimum requirements for an agreement between the host school and the CLC).
- Each site has at least one computer and a modem and connectivity.
- Placement instruments will be developed and used to place learners in the most suitable programme. In addition, learners will be offered access to counselling (career, social and learning difficulties) and RPL systems will be implemented through lead CLCs.
- Every ABET Community Learning Centre will be visited for quality assurance purposes every three years. The focus of the quality assurance will be the quality and relevance of programmes offered and ABET Level 1 – 4 and FETC throughput rates.

15.6 Resourcing information

Financial support to ABET CLCs is calculated using a formula to determine the management requirements as well as the LTSM allocations taking the number of ABET and FET learners in urban and rural areas into account.

16. Programme 7: Early childhood development

16.1 Programme objective

To provide Grade R level education in accordance with White Paper 5.

The ECD programme comprises the following sub-programmes:

Grade R in public schools

- to provide specific public ordinary schools with resources required for Grade R

Grade R in community centres

- to support particular community centres at the Grade R level

Professional services

- to support ECD sites

Human resource development

- to provide for the professional development of educators and non-educators at Grade R sites

16.2 Situational analysis

While there is universal enrolment of children of ages 6 – 15 in the Western Cape, not all five year-olds have access to Grade R. The province's goal in respect of Grade R is to provide high quality learning programmes to all five year-old children in the Western Cape at the first level of formal education, namely Grade R by 2010.

If conservative estimates of 2004 participation rates in the Western Cape are used, that is 45 000 of a possible 80 000 learners, then an additional 35 000 children must be reached in the period 2005 – 2010. This means enrolling 4 000 to 6 000 additional five year old children each year in the period 2005 to 2010. But these children must also be enrolled in high quality programmes because the provision of Grade R programmes to young children is based on the assumption that these programmes provide a solid foundation and advantage for learning in school. This assumption is supported by a number of studies, including the national systemic assessment study of Grade 3 learners undertaken in 2001. This study shows a high correlation between reading and numeracy performance at the Grade 3 level and access to pre-school programmes.

16.3 Policies, priorities and strategic objectives

The policy goal of the province is to provide high quality Grade R programmes to five-year-old children. These programmes should promote the social, cognitive, emotional and physical development of five-year olds and in particular ensure that these children experience safe and stimulating learning environments. This is particularly important in communities where parents are illiterate and homes are text and resource poor.

The National Curriculum Statement (NCS) Grade R curriculum spells out the knowledge and skills that ought to be taught to five-year-olds. The challenge for the province is to ensure that the learning outcomes of the Grade R NCS especially the literacy and numeracy outcomes are taught and acquired by all learners in Grade R sites by 2010.

Strategic objectives for Sub-programme 7.1: Grade R in public schools

Strategic Goal	Strategic Objective
To ensure access to quality education for all children living in the province.	<ul style="list-style-type: none"> • To provide Grade R spaces in public ordinary schools in accordance with policy and availability of tuition space. • To improve access to education for learners from previously marginalised groups. • To increase the number of learners in Grade R programmes so that all children of five years of age living in the Western Cape are enrolled in Grade R classes • To ensure that the NCS learning outcomes are taught and acquired in all Grade R classes (school readiness tests will be used to determine this) • To provide resources to support the teaching of the NCS Grade R to every site • To train all Grade R teachers in the NCS • To identify at risk learners and their barriers to learning.

Strategic objectives for Sub-programme 7.2: Grade R in community centres

Strategic Goal	Strategic Objective
To ensure access to quality education for all children living in the province.	<ul style="list-style-type: none"> • To provide Grade R spaces in education-funded community based sites in accordance with policy, but specifically White Paper 5. • To improve access to education for learners from previously marginalised groups. • To ensure that the NCS learning outcomes are taught and acquired in all Grade R classes (school readiness tests will be used to determine this) • To provide resources to support the teaching of the NCS Grade R to every site • To train all Grade R teachers in the NCS • To identify "at risk" learners and their barriers to learning

Strategic objectives for Sub-programme 7.3: Professional services

Strategic Goal	Strategic Objective
To ensure effective management and governance in all the learning sites and support structures.	<ul style="list-style-type: none"> • To bring management and governance support and development closer to Grade R sites through the work of the EMDCs and other professional services. • To achieve an optimal and equitable distribution of financial, physical and human resources across the system. • To improve the knowledge and skills of Grade R staff through targeted training and support • To improve the knowledge and skills of governing bodies through targeted training and support. • To improve management of the curriculum and assessment processes. • To improve financial management and quality enhancement at all levels in line with provincial policy and the legislative framework. • To provide professional support to all Grade R sites.

Strategic objectives for Sub-programme 7.4: Human resource development

Strategic Goal	Strategic Objective
To equip and support educators in their efforts to provide effective education	<ul style="list-style-type: none"> • To ensure that the province employs sufficient numbers of appropriately trained educators. • To develop the professional quality of the teaching force, through ongoing professional support on the RNCS. • To equip educators to ensure effective curriculum development, delivery and support. • To provide specialised education support to teachers.

16.4 Analysis of constraints and measures planned to overcome them

Availability of funding is a serious constraint. In other provinces the reduction in the number of learners in the primary schools will allow for the expansion of Grade R. In-migration into the Western Cape means that this route is not feasible for the WCED.

Access to many rural and remote sites remains a challenge for EMDCs.

16.5 Description of planned quality improvement measures

The WCED will in the period 2005 – 2010 ensure that -

- All children of five years of age living in the Western Cape are enrolled in Grade R classes
- The NCS learning outcomes are taught and acquired in all Grade R classes (school readiness tests will be used to determine this)
- Learning material resources to support the teaching of the NCS Grade R is provided to every site
- All ECD educators are trained and supported to deliver the NCS for Grade R
- All “at risk” learners are identified and their barriers to learning and development addressed by school based and district support teams
- All sites are visited to ensure safety and quality service delivery once every three years

16.6 Resourcing information

The resourcing of Grade R education is currently done on the basis of funding personnel as well as the provision of a subsidy for LTSM. However, the basis of funding is changing to a subsidised model only. In this way Grade R education will be resourced by the provision of a per capita subsidy determined according to a poverty sliding scale. This will be used to pay teachers, procure LTSM and to secure sites.

17. Programme 8: Auxiliary and associated services

17.1 Programme objective

To provide the education institutions as a whole with support.

The Auxiliary and Associated Services programme comprises the following sub-programmes:

Payments to SETA

- to provide employee human resource development in accordance with the Skills Development Act

Conditional grant projects

- to provide for projects specified by the national Department of Education that are applicable to more than one programme and funded from conditional grants

External examinations

- to provide for departmentally managed examination services

Teacher training

- to assist with the supply of qualified and competent educators for the teaching profession

iKapa elihlumayo

- to assist with the building of human capital

17.2 Situational analysis

The WCED has a key role to play in the fight against poverty and the expansion of the economy, as the main driver of human resource development in the Western Cape. This challenge will be supported by the following:

- The Skills Development Act;
- the HIV/AIDS Conditional Grant to provide for HIV/AIDS Life Skills education in schools, and to ensure access to an appropriate and effective integrated system of prevention, care and support (ref Division of Revenue Act);
- the provision of valid and reliable certification through examinations;
- recruiting teachers; and
- providing the foundation of all skills development.

17.3 Policies, priorities and strategic objectives

The WCED has a key role to play in conceptualising and driving a Human Resource Development Strategy (HRDS) as the main provider of:

- GET, which provides the bedrock or foundation for all HRD in the province; and
- FET, which provides opportunities to further develop the skills and knowledge required for employment and economic participation.

An important need for the HRDS is the availability of well-qualified teachers, especially those teaching maths and science. Targeted bursaries are offered to students wishing to enter the profession. Such bursaries are available to students wishing to enter fields specifically identified through research as in need of more teachers.

One of the most serious threats to the development of human resources in South Africa is the HIV/AIDS pandemic. The WCED will play a strategic role in ensuring that all teachers and learners are aware of and have information on HIV/AIDS.

Poverty is another serious threat to human resource development. In an attempt to address some of the consequences of poverty the WCED has launched the FET College Loan Scheme.

Strategic objectives for Sub-programme 8.1: Payments to SETA

Strategic Goal	Strategic Objective
To provide human resource development in accordance with the Skills Development Act.	To support the Education Training and Development Practices (ETDP) Sectoral and Education Training Authority (SETA) with regard to the administration of the sector.

Strategic objectives for Sub-programme 8.2: Conditional grant projects

Strategic Goal	Strategic Objective
To provide for HIV/AIDS Life Skills education in schools, and to ensure access to an appropriate and effective integrated system of prevention, care and support.	<ul style="list-style-type: none"> • To train and support educators to deliver HIV/AIDS Life Skills in primary and secondary schools, via the Curriculum: Life Skills/Life Orientation and the cross-curricular infusion of HIV/AIDS education into all learning areas/subjects. • To provide for the development, selection, translation, procurement and distribution of teaching and learning support materials to support effective HIV/AIDS life skills education in the classroom. • To develop and implement an effective, structured and co-ordinated adolescent-to-adolescent peer education initiative in schools and FET colleges • To ensure that SMTs and key parent SGB and community representatives are provided with the necessary training to manage an institutional AIDS response (inclusive of the development of a locally-appropriate AIDS policy and Management Plan - within the context of the SDP). • To ensure that schools participate in key advocacy events (such as School AIDS Month, World AIDS Day, etc.) • To develop and implement a generic Care and Support training programme for school-communities, with appropriate material support, in a way that ensures local networking and support. • To ensure an effective Provincial HIV/AIDS Management Unit at head office to co-ordinate this response, as well as staffed district-based management teams. • To ensure the development and maintenance of policy, advocacy, master trainers, educator development, district support, inter-sectoral collaboration and partnerships, quality assurance (through monitoring and evaluation), effective and efficient programme delivery and financial management.

Strategic objectives for Sub-programme 8.3: External examinations

Strategic Goal	Strategic Objective
To promote organisational efficiency and effectiveness.	To manage the Senior Certificate and ABET Level 4 examinations and certification thereof.

Strategic objectives for Sub-programme 8.4: Teacher training

Strategic Goal	Strategic Objective
To equip and support educators in their efforts to provide effective education.	<ul style="list-style-type: none"> • To ensure that the province employs sufficient numbers of appropriately trained educators. • To assist with the supply of qualified and competent teachers. • To support efforts to recruit student teachers to pre-service training institutions.

Strategic objectives for Sub-programme 8.5: iKapa elihlumayo

Strategic Goal	Strategic Objective
To support the provincial goals of iKapa elihlumayo: <ul style="list-style-type: none"> ▪ increased economic growth ▪ increased employment and participation in the economy ▪ reduced socio-economic and geographic inequality ▪ maintenance of a sustainable safety net 	<ul style="list-style-type: none"> • To test skills and aptitudes of grade 8 learners • To develop a career guidance programme for Grade 9 and FET learners • To train GET and FET teachers to provide career advice • To promote the development of FET programmes that are responsive to the social and economic needs of the province. • To provide loans to learners from poor backgrounds who wish to study at FET colleges.

17.4 Analysis of constraints and measures planned to overcome them

It is increasingly difficult to attract good quality, dedicated persons to the teaching profession. The reasons for this are complex and intertwined and relate both to the public view of education and the opportunities available to young graduates both in South Africa and abroad. The WCED has launched a teacher recruitment campaign with the local Higher Education Institutions. This has had some success and more effort will be invested in this campaign in the next five years.

There are very few qualified guidance teachers left in the WCED. This means recruiting and training teachers in this important and skilled area from scratch. This will not be easy. The WCED has devised a three-year programme to develop the skills of life orientation teachers in respect of subject and career guidance.

It has not been easy to establish the necessary processes and controls for the FET College Loan Scheme. The WCED has consulted and worked with the National Students Financial Aid Scheme of South Africa (NSFAS) and has adopted many of the processes. In addition, poor learners reacted with suspicion to the concept of loans. The WCED has had to change the name of the scheme to financial aid scheme and to conduct considerable advocacy concerning the scheme.

17.5 Description of planned quality improvement measures

None at this stage.

17.6 Resourcing information

Teacher education:

- Meetings with Higher Education Institutions (HEI) are held twice per annum to ensure curriculum programmes offered at Institutions suit the employment needs of the WCED. Bursaries are awarded to student teachers in scarce subjects.

IKapa Elihlumayo:

- The establishment of a loan scheme to enable students to access FET colleges.
- The six public FET colleges in the province submitted proposals for courses to be developed that meet the needs of the province. These proposals have been scrutinised and improved for implementation in 2005.
- A career guidance course has been developed for the province. It has been translated into Xhosa and Afrikaans and the course will be installed on computers at each high school in the province. 800 selected teachers will be trained on the use of the software in February 2004. The guidance course provides trends in the provincial economy and provides details of existing FET programmes and learnerships.

18. Capital investment, asset management and maintenance

Physical Infrastructure

The system whereby the budget for infrastructure development and scheduled maintenance has appeared on the books of the Department of Transport and Public Works (Works) came to an end on 31 March 2005. From 1 April 2005, the WCED budget will reflect the construction or maintenance budget for the year. The WCED will thus be taking full responsibility for its budget (starting with the negotiations for a budget and ensuring the signing of a service level agreement that will determine the nature of the relationship between WCED and Works with regard to the quality of service required, reporting, time frames and management of projects

The Department of Transport and Public Works will thus be an important implementing agent of the WCED (as governed by the service level agreement) and will submit progress and financial reports. Other service level agreements may also be negotiated with other service providers, such as school governing bodies, municipalities or the CSIR.

The average learner-classroom ratio stands at present at approximately 29. This low learner-classroom ratio indicates that there is an excess of classrooms in the Western Cape. However, many of these classrooms are situated in areas where there is no shortage of classrooms and are of no assistance in addressing real classroom shortages in areas affected by migration, where there are huge classroom shortages.

With a projected influx of approximately 48 000 people annually into the Western Cape from other provinces, it is clear that the need for additional classrooms will increase in those areas.

It is also clear that the system will struggle to meet the growing need, unless additional capital is made available in the short term.

It is of paramount importance that excess classrooms be taken out of the system by making best use of school accommodation and by making excess schools available for other programmes of the WCED, such as ECD, FET, ABET, ELSSEN.

Furthermore, classrooms constructed from unsuitable building materials, such as wood, asbestos or chipboard, are easily vandalised and should be taken out of the system, returned to the Department of Transport and Public Works, and sold. The proceeds should be made available for the building of additional infrastructure.

Another important factor, the upgrading of informal areas in the Western Cape, will, in future, put tremendous pressure on the system. The upgrading process results in a situation that, when an undeveloped space accommodating 10 to 20 families is upgraded, only 1 family may return to live in that upgraded area. The other 19 families will need to be relocated to an area without schools or already experiencing classroom shortages. According to the anticipated time required for the developing of Greenfields areas (areas that families will be relocated to), the housing units will be available long before the school facilities are completed. Pressure may then be exerted on the education department to provide, at huge cost, learner transport to schools with available space. At the same time, many schools near to the initial informal area will be losing pupils and will no longer be overcrowded. However, there is the danger that some of them will become uneconomical entities.

It is important to note that each of these new classrooms built will be duplicating a classroom in excess in another area. It is thus important that schools be amalgamated where possible and that buildings be made available for other programmes of the WCED.

The WCED and the Department of Transport and Public Works are of the opinion that classroom shortages should be addressed by building permanent classrooms only if the school is allowed to expand to a capacity of 1 120 learners as a primary school or 1 200 as a secondary school. Approval to allow a school to grow much larger should be evaluated, applying the criteria that are being developed for mega-schools.

Interim shortages, such as shortages experienced by schools near informal areas, should not be solved by building permanent classrooms but by providing good quality pre-fabricated classrooms.

The following building projects are under construction or being tendered or being planned:

New projects	2005/06 (Voted)	2006/07 (MTEF)	2007/08 (MTEF)	2008/09 (Projected)	2009/10 (Projected)

19. Co-ordination, co-operation and outsourcing plans

19.1 Interdepartmental linkages

The WCED will take the lead in developing, implementing and monitoring the province's Human Resource Development Strategy (HRDS). However, the magnitude of the task requires that all government departments, at provincial and local government level, support and contribute to the implementation of the Strategy. Key departments include the Departments of Health, Social Welfare and Poverty Alleviation, Community Safety as well as Transport and Public Works. In addition, the social partners, namely organised business, organised labour and civil society, through the Provincial Development Council, have a key role to play in shaping and implementing the HRDS.

Regular meetings and discussions are held with the national Department of Education and the other provincial education departments regarding education policy.

Discussions with sister departments on intersectoral collaboration also take place on a regular basis, especially with the Departments of Health (HIV/AIDS and life skills), Community Safety (Safe Schools Project and Learner Support Officers Project to reduce truancy and juvenile offending), Economic Development and Tourism (Learning Cape Festival and economic growth sectors) and Transport and Public Works (capital projects and maintenance).

Quarterly meetings are held with the ISLP co-ordinating committee for the provision of school buildings in previously disadvantaged areas.

Discussions with sister departments on Integrated Holistic Development also take place on a regular basis.

19.2 Local government linkages

The WCED co-operates with the City of Cape Town regarding the Urban Renewal Programme (URP) and the Central Karoo Municipality regarding the Integrated Sustainable Rural Development Programme (ISRDP). The aim of both programmes is to work collaboratively and integratedly with other departments and governments to alleviate poverty through skills development for unemployed people.

Some discussions took place between the WCED and the City of Cape Town with regard to –

- aligning the HIV/AIDS and Life Skills Programme.
- aligning the WCED's ICT initiatives with the Smart Cape initiatives.
- the approval of structure plans (Town Planning).

19.3 Public entities

There are currently no public entities for which the WCED is responsible.

19.4 Public-private partnerships (PPPs)

PPPs will be a key area of intervention for the WCED, both from the perspective of rationalising existing projects in our schools, as well as mobilising more resources for deployment in education development.

The WCED has introduced a number of interventions and projects in an effort to address various aspects of quality education in schools. These projects and interventions are managed either by the WCED (through the EMDCs) directly, or through several education non-governmental organisations (NGOs).

The WCED is collaborating with 6 private developers in the development of systems for use in the School Administration and Management Systems (SAMS) Project.

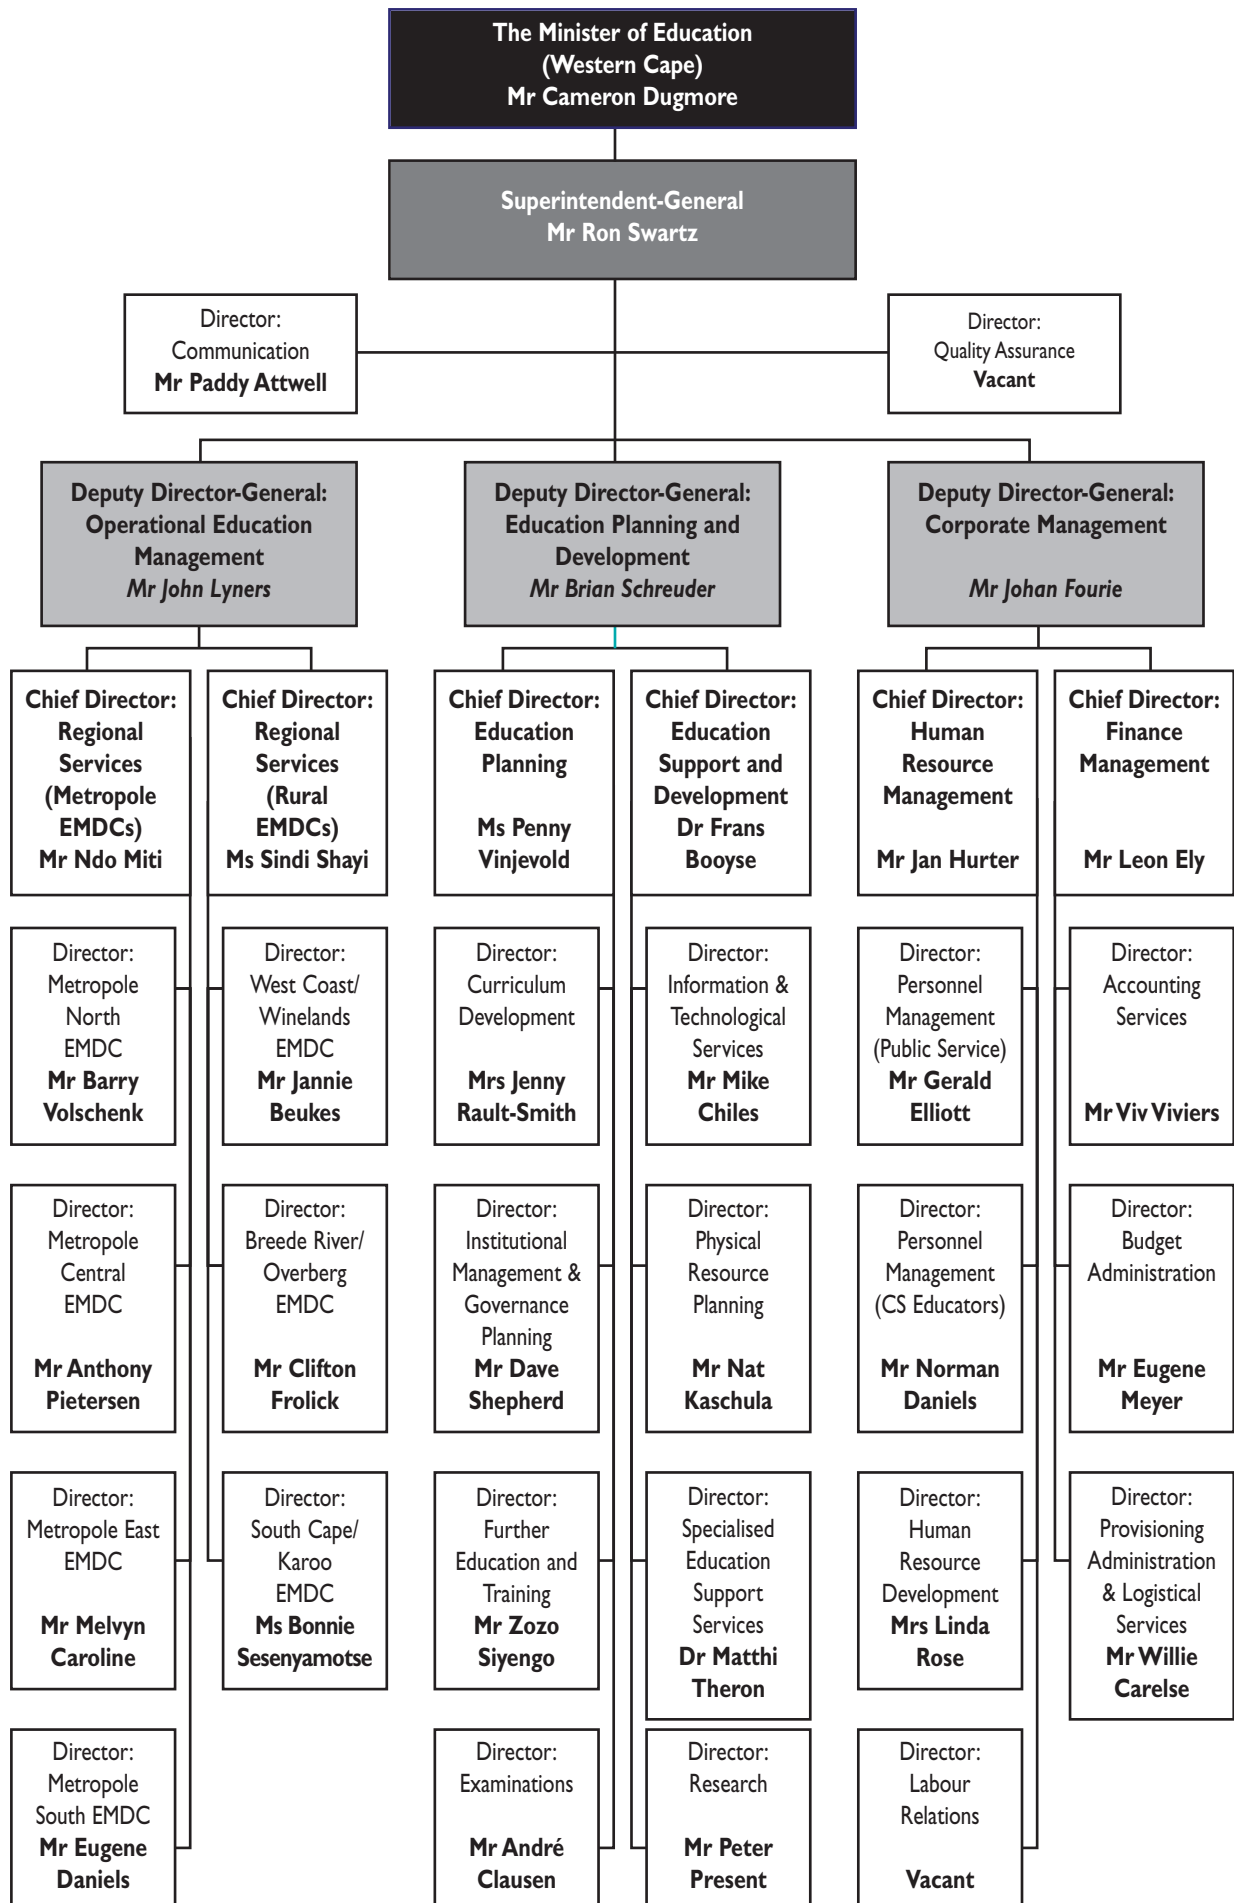

The WCED is also collaborating with –

- PETRO SA - They completed a R12m school for Rietvlei Primary School in Mossel Bay and have fully equipped all 4 ex DET schools in Mossel Bay with state-of-the-art computer and science laboratories
- Chamber of Commerce – Technopreneur competition Grade 10
- SANTAM – Funding best Practices for EMS
- Cape Town Holocaust Centre – Facing History and Ourselves Grades 9 – 12.

The first draft of the WCED's Strategic Accommodation and Infrastructure Plan mentions that the WCED and the Department of Transport and Public Works should make a co-ordinated attempt to create joint ventures with business to assist with capital and maintenance expenses at schools and by so doing alleviate infrastructure shortages at schools. The Department of Transport and Public Works is at present seeking a PPP to build a new special school. The WCED anticipates that negotiations will be concluded during the 2005/06 financial year.

List of abbreviations

ABET	Adult basic education and training	LTSM	Learning and teaching support materials
AFET	Adult further education and training	MSP	Master systems plan
